

Delta Colours to distribute SE Tylose, Cellulose Ethers in South Africa.

Delta Colours is proud to announce that an agreement with SE Tylose, has been reached, to distribute their range of HEC and MC Cellulose Ethers in South Africa.

Delta Colours supply organic and inorganic pigments & specialty chemicals in South Africa for use in a variety of industrial applications including plastics, coatings, inks, construction and cosmetics.

“We are extremely happy to be partnering with a well-respected supplier such as SE

Tylose whose products are a great addition to our already extensive portfolio. Our superb customer service, personalised technical support and next-day nationwide delivery will enable Delta Colours and SE Tylose to keep adding value to our markets,” commented Petrus Scheepers, Sales Director and co-owner of Delta Colours.

Hydroxyethyl cellulose (HEC) and methyl cellulose (MC) ethers are used in applications such as adhesives, cement renders, trowelling compounds, gypsum based building

materials, architectural paints, adhesives, sealants, road marking paints and other construction products.

About SE Tylose: SE Tylose GmbH & Co. KG is a medium sized German company. It 100% belongs to Japanese Shinetsu Group. With its manufacturing plants in Wiesbaden, Germany, in Plaquemine (Louisiana), USA, and in Naoetsu, Japan, Shin-Etsu Chemical Ltd. is one of the world’s largest suppliers of methyl cellulose (MC) and hydroxyethyl cellulose (HEC).
